

We at the office of Dr. Andrew Bushey would like to address the recent concerns over the COVID-19 (Coronavirus) pandemic.

The health and well-being of our patients, parents, children, and staff remain our top priority.

Bushey Oral and Maxillofacial Surgery would like you to know what we are doing to keep everyone as safe as possible.

We are asking any of our patients and escorts who have traveled internationally in the last 14 days to reschedule their appointments

We are encouraging patients who display symptoms of the virus (fever, shortness of breath, cough), patients who have come into contact in the last 14 days with someone who has been confirmed to have the virus, or those patients who do not feel well to re-schedule their appointments. This policy also applies to our staff.

We are continuing to practice Occupational Safety and Health Association (OSHA) standards regarding sterilization/infection control but have also increased our protocol to include consistent disinfection of all surfaces involved in human contact. These surfaces include (but are not limited to) countertops, desktops, computer keyboards, door-knobs, light switches, phones, waiting room chairs...etc.

We will continue to keep our patients updated on any changes in policy regarding COVID-19 as this is a fluid situation and will likely change.

In the meantime, we ask that you continue to practice excellent oral hygiene, get plenty of rest, maintain a healthy diet, practice social distancing, and wash those hands!

We are asking all patients (unless a minor) to come alone to your visit., unless otherwise specified by Dr. Bushey. We will be notifying all patients of their upcoming appointments. Please contact the office before coming to your appointment as we are currently seeing patients on an emergency basis only.

Thank you for your patience during this challenging time.

Respectfully,

Andrew Bushey, DMD MD
